The Sorting Hat

BY YONG LIANG AND SAM LUDWIG

Idea
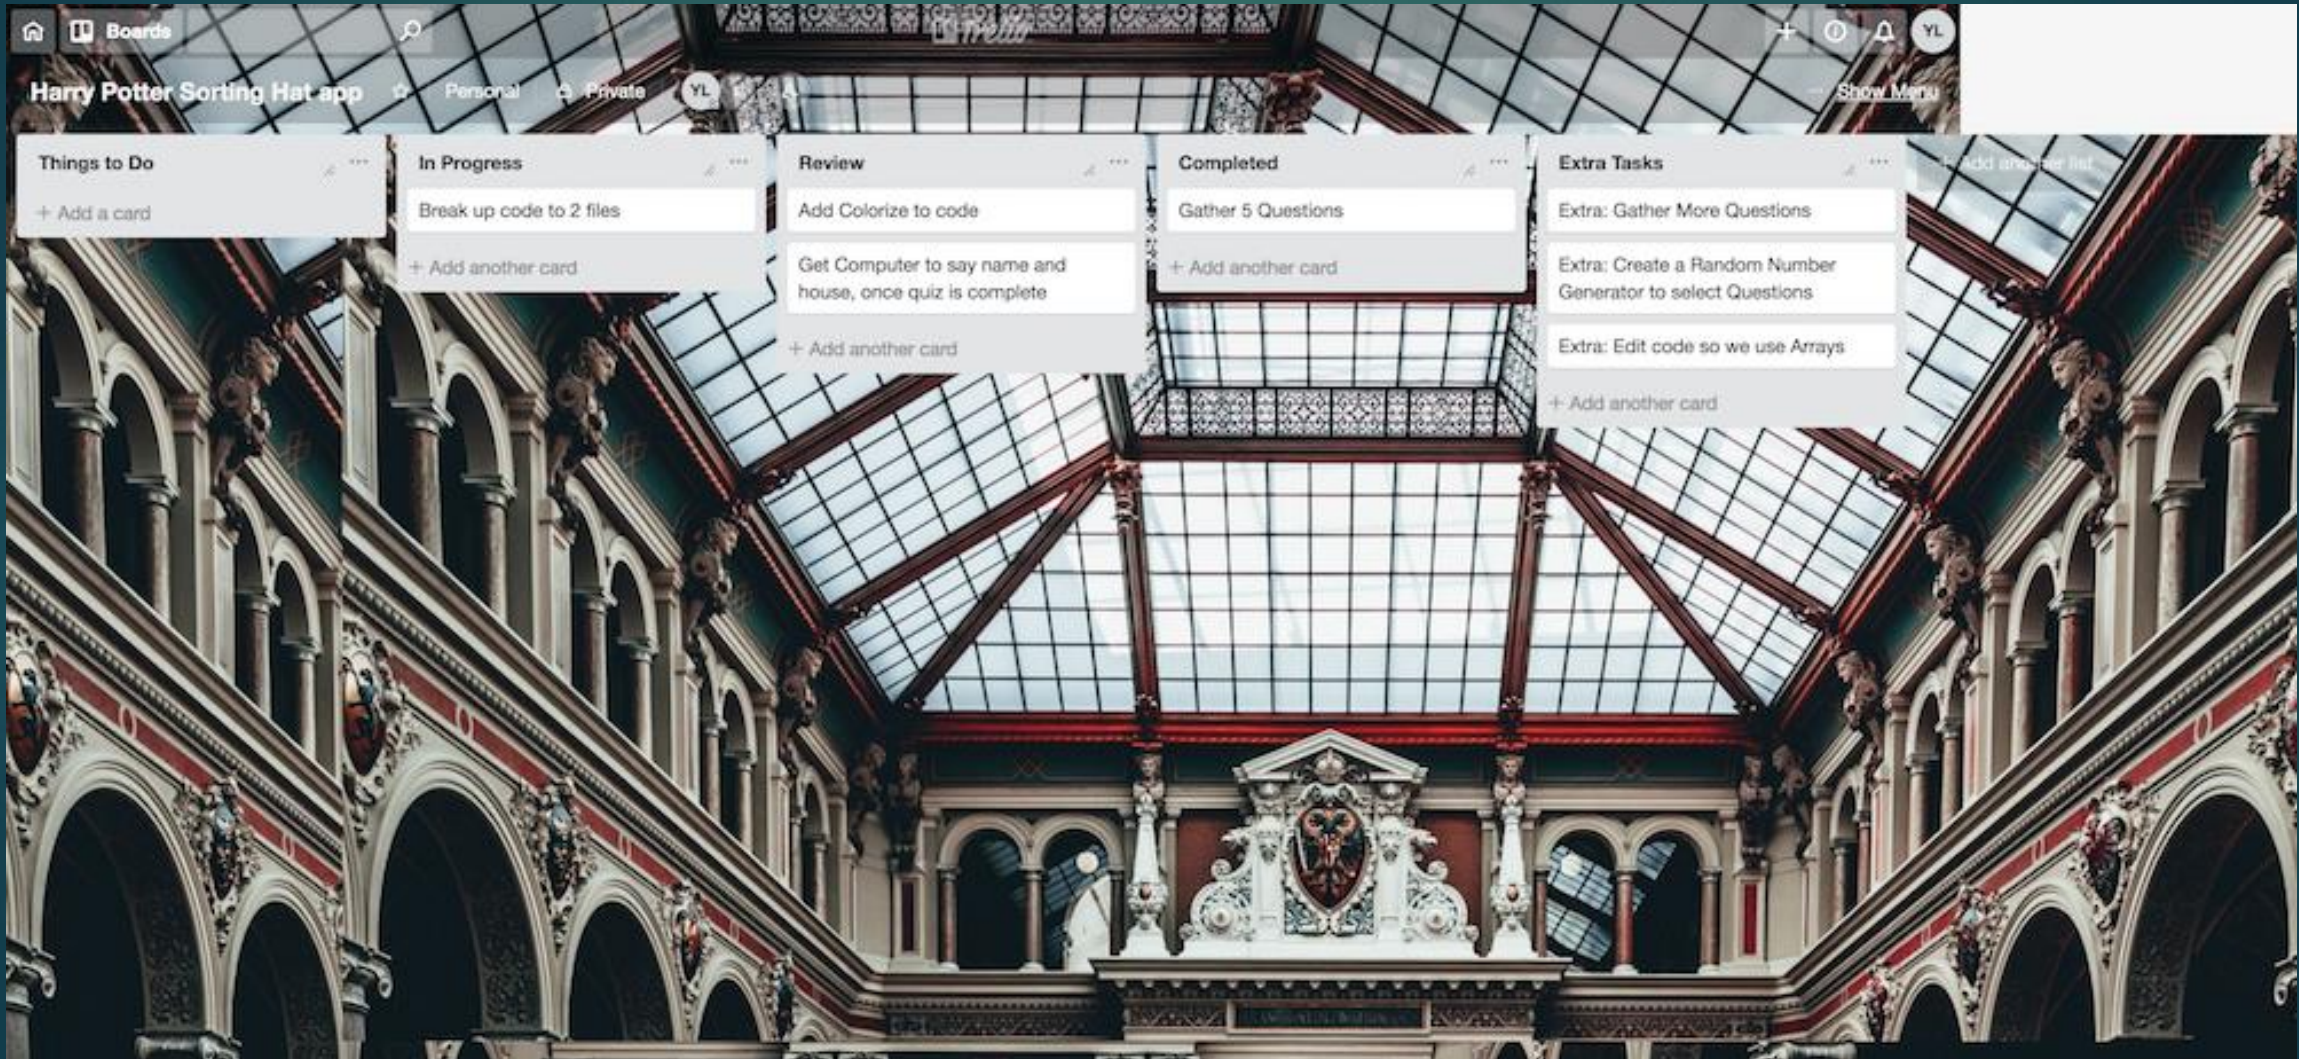

A quiz using harry potter themed questions to determine the house the user will be put in.

Planning process

Challenges

Randomizer while loop

```
dup_preventer = [] #Array stores rand number to be compared again
while counter < 7
    question_number = random_question_selector

    while dup_preventer.include?(question_number) == true
    question_number = random_question_selector
    end

    question_selector(question_number)
    dup_preventer.push(question_number)
    answer = gets.strip.to_i
```
